- NeoFace Watch real-time face recognition: How does it work?

In the midst of what is termed the Fourth Industrial Revolution, the world has seen unprecedented advances that have come together to impact everyday life like never before. The convergence of cloud computing, artificial intelligence, the Internet of Things and many related innovations in the past five years has brought about profound change and disruption to countries, industries and the people who are part of them.

Accelerating urban development is necessitating an urgent response to address multiple forms of threats proactively and identifying technologies with proven track record in leading safe city solutions.

NEC displays extensive capabilities in advanced technologies and solutions that are aligned with the challenges faced by organizations. Its leadership in biometrics, video analytics, and big data analytics are incorporated into diverse vertical-focused solutions addressing security challenges under different scenarios. With years of experience in security solutions, NEC remains committed to its “Safer City” vision with solutions that bring about a win-win outcome for all stakeholders.

Enabling the safety, security of people's lives through fast and accurate personal identification.

Civil ID

Predictive identification system that solves crimes and saves lives.

Law Enforcement

Highly accurate recognition technologies that eliminate threat in high-traffic spaces.

Surveillance

Advanced ICT solutions for safety, security and efficiency in air travel.

Aviation
